the
public

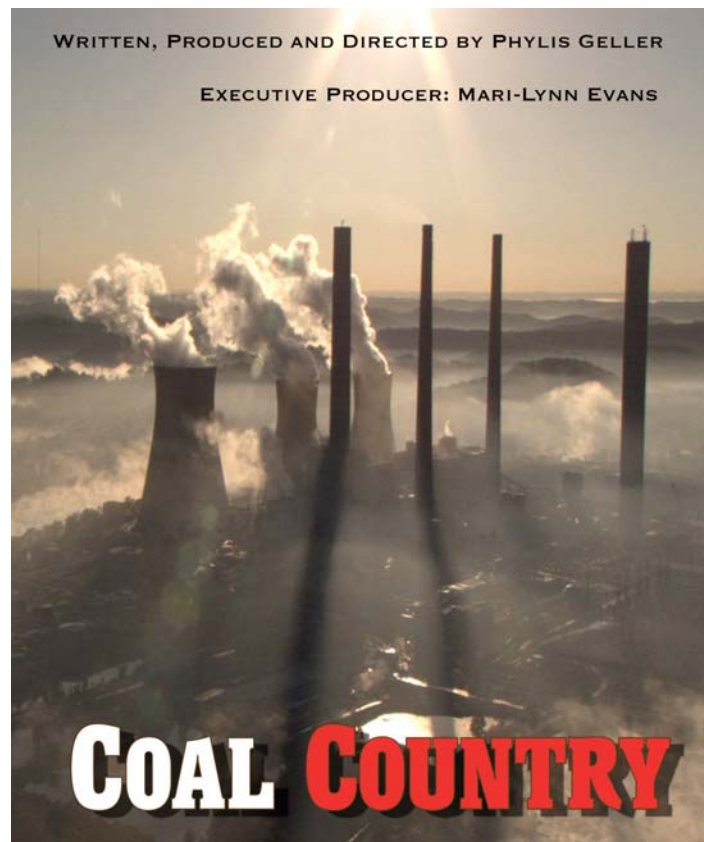

The Akron Civic Theater

Reception, Screening, and After-Movie Party

September 12, 2009

8:00 P.M.

A film that will change the way you see the relationship between government, the moneyed interest who influence and profit from policy, and the people caught in the middle. A film not to be missed!

Join Akron filmmaker and Executive Producer of Coal Country, **Mari-Lynn Evans**, actress **Daryl Hannah**, featured local activist **Elisa Young**, and county music singer **Kathy Mattea**, whose poignant music is heard throughout this award-winning movie. Invited guest **Robert Kennedy, Jr.**, has said that the politicians who allow Mountain Top Removal mining (MTR) are endorsing criminal behavior while destroying their constituents' land. This is a must-see film that will make you question, as in the old union mining chant, "Which side are you on?"

Presented by **Progressive Democrats of America—Ohio** and the **Portage Trail Sierra Club**. Coal Country is an award-winning documentary and finalist in the prestigious Jackson Hole Wildlife Film Festival. An incisive, gripping, and heart-wrenching film, Coal Country presents us with the devastating environmental, cultural, economic, and medical consequences of MTR, and challenges us to question the continued use of this extreme and divisive practice in pursuit of our insatiable quest for cheap energy.
